

GREENBELT AFFORESTATION WORKS IN DAM WATERSHEDS

Greening our watersheds,
protecting our water resources...

Within the scope of our 5-year Action Plan, various activities in 400 dams and ponds were planned. By the end of 2016, works related to afforestation, erosion and sediment control, water quantity and quality enhancement, and establishment of new recreational and tourism areas were completed in 312 dam and pond watersheds.

Forest and Water is Life.
