

EROSION CONTROL ACTIVITIES

Reducing erosion,
increasing productivity...

Within the scope of our 5-year Action Plan, various erosion control activities were planned on 1,400,000 hectares of land. By the end of 2016; afforestation, rehabilitation, erosion control, and pasture restoration works were completed on 1,216,936 hectares. The Ministry of Forestry and Water Affairs strive to ensure the protection and sustainability of forest and water resources.

Forest and Water is Life.
