

FORESTS IN TURKEY

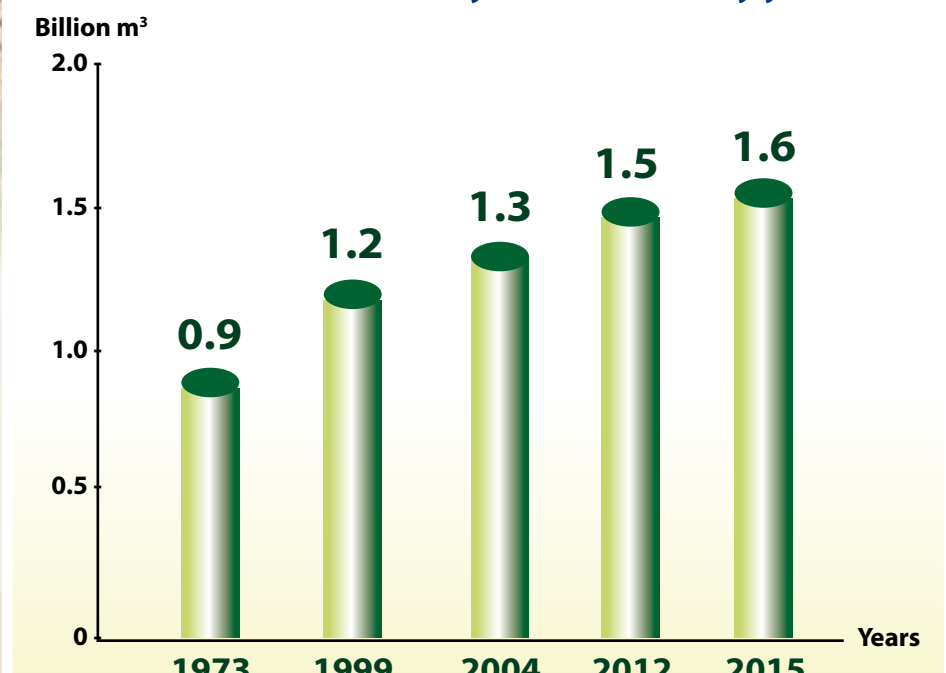

Forest assets of Turkey over the years

Approximately 2.1 million hectares of increase in forestlands over the past 42 years

Forest assets of Turkey's forestlands by year

There's been a 700 million m³ increase in tree assets of Turkey's forests between the years 1973 and 2015.

Forestlands comprise 28.6% of Turkey's surface area. We commit to our national wealth, and continuously increase our forestlands through our numerous afforestation projects.

Forest and Water is Life.
