

UPPER WATERSHED EROSION AND FLOOD CONTROL ACTIVITIES

Saving lives and properties...

Within the scope of our 5-year Action Plan, 225 flood-prone watersheds in 25 main river basins were identified, and flood and overflow control works were planned on 4,130,388 hectares of land. By the end of 2016, flood control works in 200 flood-prone watersheds were completed.

Forest and Water is Life.
