

Republic of Turkey Ministry of Environment, Urbanization and Climate Change develops projects and takes measures to spread environmentally friendly bicycle transportation route in all our cities and non-residential areas in order to reach the environmental awareness and sustainability targets that are emerging all over the world and to fulfill the responsibilities we have undertaken with international agreements.

In this framework, the partnership with Bilkent University has been established for the preparation of the "Turkey Inter-Settlement Transportation and Touristic Bicycle Route Network Master Plan" and a contract is signed to develop the bicycle as a safer, cheaper and sustainable mode of transportation for various purposes, especially in areas outside the residential areas that are mostly outside of the authority and responsibility of the municipalities.
