Technical Assistance for Capacity Building on European Pollutant Release and Transfer Register (E-PRTR) in Turkey

TR2013/0327.06-01-02/001

Public Access to Data is prescribed by Environmental law.

Principle of public information and participation

In the exercise of the right to healthy environment everyone shall be entitled to be informed of the environmental status and to participate in the process of decision making whose implementation may have an effect towards the environment.

NIRAS

This project is co-financed by the
European Union and the Republic of Turkey

TR2013/0327.06-01-02/001

Information system

Article 74

In order to effectively identify, classify, process, monitor and record natural values and environmental management in the Republic of Serbia, an information system for environmental protection (hereinafter referred to as the information system) is being established and maintained.

The information system ensures the formation, classification, processing, maintenance, presentation and distribution of numerical, descriptive and spatial databases on: quality of environmental media, monitoring of the state and environmental protection, legislative, administrative and organizational and strategic measures, scientific and technical information on planning measures of prevention and exchange of information with other information systems, etc.

NIRAS

This project is co-financed by the
European Union and the Republic of Turkey

Technical Assistance for Capacity Building on European Pollutant Release and Transfer Register (E-PRTR) in Turkey

TR2013/0327.06-01-02/001

The information system is managed by the Environmental Protection Agency.

The information system provides access to other information systems and harmonization of all relevant information and data at the national and international level.

The Environmental Protection Agency is established and managed by the National metaregister for environmental information (hereinafter: the National Metaregister), which is an integral part of the information system.

The national metaregister is an electronic database and a portal to existing databases and environmental information documents of various bodies and organizations.

Public authorities shall, in accordance with the law, at least once a year or if necessary, at the request of the Ministry, update the data in the National Metaregister.

NIRAS

This project is co-financed by the
European Union and the Republic of Turkey

Technical Assistance for Capacity Building on European Pollutant Release and Transfer Register (E-PRTR) in Turkey

TR2013/0327.06-01-02/001

The Environmental Protection Agency is obliged to provide and maintain environmental information processing resources.

The public authorities referred to in paragraph 7 of this Article shall be responsible for the accuracy of the updated data.

The Government shall prescribe in detail the content and manner of keeping the information system, methodology, structure, common base, categories and levels of data collection, as well as the content of information that is regularly and necessarily informed to the public.

Ecoregister, the National Metaregister for Environmental Information, represents an electronic database and a portal to the existing databases and documents with environmental information, established to provide quick, easy and simple public access to environmental information, and to improve general availability of such information for the general public. The project was conducted by the Ministry of Energy, Development and Environmental Protection of the Republic of Serbia and the Environmental Protection Agency of the Republic of Serbia, with the support of the Organization for Security and Co-operation in Europe (OSCE).

POLLUTION RELEASE AND TRANSFER REGISTER

On: ☺

Dear users,

Welcome to the Pollution Release and Transfer Register portal of Republic of Serbia. This Register is a part of National Register of Pollution Sources, leads by Serbian Environmental Protection Agency.

PRTR register is a special international treaty developed as a Protocol of the Aarhus Convention and it is a new kind of international agreements in the environmental field. For the first time and on a detailed and specific way environmental issues and human rights are linked.

Serbia and Montenegro signed the PRTR Protocol in 2003. Serbia ratified protocol in 2011.

Serbia started with implementation of the PRTR Protocol and E-PRTR directive in 2008. Information system was developed in 2012, and GIS was developed in 2016.

In 2011, Serbia began with the submission of data from the E-PRTR Register of the European Environment Agency in Copenhagen on a voluntary basis, which is positively rated by the European Commission in all EC Progress Reports.

Serbian National PRTR portal Navigation

The screenshot displays the Serbian National PRTR portal interface. At the top left, the header reads "PRTR Srbija" and "Agencija za zaštitu životne sredine". Below this is a navigation bar with a home icon, a menu icon, and a timeline from 2009 to 2014. The main area shows a map of a region with a red lightning bolt icon indicating a power plant. A popup window titled "Pogon" provides details for "PD Termoelektrane Nikola Tesla", including its national ID (101217456/1), address (Bogoljuba Urosevica Crnog 44, 11500 Beograd-Obrenovac), and primary activity (35.11 - Production of electricity). Below the popup are buttons for "Emisije u vazduh", "Emisije u vode", and "Upravljanje otpadom". On the right, a "Legenda" panel lists various industrial sectors with corresponding icons: Energetski sektor, Proizvodnja i prerada metala, Mineralna industrija, Hemijska industrija, Upravljanje otpadom i otpadnim vodama, Proizvodnja papira i proizvoda od drveta, Intenzivna proizvodnja stoke i ribarstvo, Prehrambena industrija, and Druge industrijske grane.

Filters

- Geographical areas
- Waste codes
- Amount

The screenshot displays the 'Tretman otpada' (Waste Treatment) filter window. It includes a dropdown for 'Izveštajna godina: 2015' and a section for 'Geografske celine' (Geographical areas) with a search bar and a list of regions in Serbia. The list includes 'Srbija' with sub-regions like 'Srbija - Jug' and 'Srbija - Sever'. There are also expandable sections for 'Vrste otpada i indeksni brojevi' (Waste types and index numbers) and 'Količine otpada' (Waste amounts). A 'Kategorije' (Categories) sidebar on the right shows 'Tretman otpada' selected. Buttons for 'PONIŠTI' (Reset) and 'FILTRIRAJ' (Filter) are at the bottom of the window.

NRIZ GIS Waste management portal

The screenshot displays a web-based GIS interface. A map of the Balkan region is visible in the background, with a yellow highlight over a specific area. Overlaid on the map is a window titled "Postrojenje" (Facility). The window has three tabs: "Podaci o preduzeću i postrojenju" (selected), "Dozvole za upravljanje otpadom" (Waste management permits), and "Generisanje otpa" (Waste generation). The "Podaci o preduzeću i postrojenju" tab contains the following information:

Podaci o preduzeću:
PIB: 108834325
Matični broj: 17870157
Naziv preduzeća: Opšta bolnica Bor
Opština: Bor
Adresa: dr Dragiše Mišovica 1

Podaci o postrojenju:
Nacionalni ID: 108834325/1
Naziv postrojenja: Centar za tretman infektivnog otpada

At the bottom of the window, there is a search icon and the text "Zumiraj na" followed by a link "Izvoz podataka" (Export data).

Трибина "Мапирање циркуларне економије у Србији"

Агенција за заштиту животне средине је учествовала на трибини под називом "Мапирање циркуларне економије у Србији", одржаној 8. фебруара 2018. године у просторијама Привредне коморе Србије, у организацији Удружења индустрије отпада Србије "Храбри чистач", Групе за анализу и креирање јавних политика, а уз подршку компаније *Veolia*. Трибина је била део преко 60 догађаја који су се одржали широм света, у оквиру светске недеље посвећене теми циркуларне економије покренуте од стране *Circular Economy Club* (Клуб за циркуларну економију) из Лондона.

Трибина је имала за циљ да прикаже еколошке и економске предности, али и могућности и проблеме увођења циркуларне економије у Републици Србији. Представница Агенције за заштиту животне средине је истакла значајну улогу Агенције у тој области, јер Агенција активно сарађује са ЕЕА и припрема Национални профил за Извештај ЕЕА о ресурсној ефикасности, циркуларној економији и снабдевању сировинама "2018 More From Less Report".

Овде можете наћи претходни извештај "More from less - material resource efficiency in Europe", а Национални профил Републике Србије из 2016. године **ОВДЕ**.
